

**Purpose:** Find the best source of cells for your patients. For every search, you have matching tools, support, and expert advice from our team—all grounded in research and analytics. Our goal: to help you efficiently manage the search and testing process and find the best match for your patient.

### Pre-Learning

**[MatchSource® Interactive Training Guide](#)**

Access interactive training that allows you to go to the micro lessons you need to do your job. You can use the Training Guide on any internet-connected device, whether that’s a computer, tablet, or phone.

To prepare for the Preliminary Search session, click this link: [MatchSource® Interactive Training Guide](#) and complete the following lessons:

- Enter or Edit a Patient Search
- View Summary Counts
- Explore Search Results
- Create Order Preview List (OPL)
